

PLEASE BE PATIENT DRIVER HAS SPECIAL COMMUNICATION & AIRWAY NEEDS!

I have had a total laryngectomy.
My voice box has been removed.

I do not receive air through my
nose or mouth.

I only breathe through a hole in
my neck.

It is critical to keep this space
open in a medical event.

See The Back Of This Card

I may communicate using a small
device placed to my neck,
by pressing a button on my neck,
by writing, using my phone, or
gestures.

This is not a weapon
